Connor Dance Floor Systems are engineered sprung solutions that balance the safety and wellness of the performer with the uniformity and control necessary for optimized performance. Each continuous, integrated subfloor design provides consistent sound and performance across the whole of the studio and stage surface. Alliance Dance is designed to match a basketweave system while exceeding the minimum ANSI performance standards. Alliance Dance is ideal for all dance disciplines when used as a system with Connor Dance Vinyl.

Area Deflection:	8

For optimal safety and performance, install with a Connor Sport Dance Vinyl. For most updated specification, installation, and product detail, visit [connorsports.com](http://connorsports.com).

"The dance floor is the most important element in a dancer's life. If the floor isn't suitable to properly and kindly receive the dancer's weight as she executes her steps and lands from jumps, the daily wear and tear on the body wears heavily over time."

— Benjamin Millepied, L.A. Dance Project
