PERMAFLEX™ SPECIALTY HARDWOOD SYSTEM

This unique subfloor design encapsulates Rezill™ pads between an upper flex sleeper and a lower base sleeper to extend the system's resilient life and accommodate heavy non-athletic loads through use of manufactured 16-gauge steel-encased sleeper subfloor supports. A truss support option allows for profile height adjustment ideal for retrofit installations.

NOTES FOR PERMA-FLEX DIN
1) SLEEPERS ARE 16" ON CENTER
2) PLYWOOD IS 15/32" THICK
3) MAPLE IS 25/32" THICK
